

D2 Business Park Masterplan, Aberdeen

RSP were commissioned by Miller Developments to carry out the utilities masterplan for the D2 development at Dyce, Aberdeen.

RSP prepared load assessment for the complete development and this assessment was used to determine the projected energy usage for the site and was used as a basis for liaising with utility providers.

This masterplan included the new electrical, gas, water, telecom infrastructure to feed the site as well as interfacing with Aberdeen Council for street lighting design to obtain Road Construction Consent.
