

Musselburgh Primary Care Centre

RSP were appointed by NHS Lothian to provide M&E design services to supply a mixture of health and wellbeing departments within a new primary centre at Musselburgh, East Lothian.

The 6,300m² facility incorporates minor surgery, pharmacy services, dentistry, physiotherapy, dietary, radiology and GP services. In addition community facilities and NHS Lothian administrative offices are being provided.

The project was procured under a traditional contract and was completed in May 2012 on budget and on programme.

The project obtained a BREEAM Excellent rating which included low energy solutions such as natural ventilation, LED lighting, low water consuming sanitation, underfloor heating and CHP.
